#### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

#### Status

- 1) Responsive to communication(s) filed on 03 January 2005.
- 2a) This action is FINAL.                    2b) This action is non-final.
- 3) Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

#### Disposition of Claims

- 4) Claim(s) 34-106 is/are pending in the application.
- 4a) Of the above claim(s) 36,37,40-48,57,58,61-69,76-96 and 100 is/are withdrawn from consideration.
- 5) Claim(s) \_\_\_\_\_ is/are allowed.
- 6) Claim(s) 34-35,38-39,49-56,59-60,70-75,97-99, 101-106 is/are rejected.
- 7) Claim(s) \_\_\_\_\_ is/are objected to.
- 8) Claim(s) \_\_\_\_\_ are subject to restriction and/or election requirement.

#### Application Papers

- 9) The specification is objected to by the Examiner.
- 10) The drawing(s) filed on \_\_\_\_\_ is/are: a) accepted or b) objected to by the Examiner.  
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).  
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

#### Priority under 35 U.S.C. § 119

## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims rejected under 35 U.S.C. 102(b) as being anticipated by Rusz et al. (4,770,168).

Rusz et al. teaches in the least, a housing, a chamber having an entry and exit port and a pharmacologic agent contained within the chamber and capable of being mixed with the gas stream.

### ***Claim Rejections - 35 USC § 103***

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later

Art Unit: 3763

invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

5. Claims 34-35, 38-39, 49-56, 59-60, 70-75, 97-99, and 101-106 are rejected under 35 U.S.C. 103(a) as being unpatentable over Bartels et al. (U.S. 4,621,632) in view of Daniell et al. (6,050,260), and further in view of Rusz et al. Bartels et al. teaches a method of providing for a period of time, heated and humidified gas into a patient by directing a gas from a source to a chamber, humidifying the gas within the chamber with liquid, replenishing the liquid, heating the gas, filtering the gas, sensing the temperature, controlling the electrical power, wherein the step of heating and humidifying performed on the gas is simultaneous, with the chamber adjacent to the patient. Bartels teaches all of the limitations of the claims except for explicitly reciting a humidity sensing means and a monitoring means connected to the humidity sensing means for monitoring the humidity of the gas and keeping it within a determined threshold. Daniell et al. teaches a humidity sensing means and a monitoring means for monitoring the humidity of the gas and keeping it within a determined threshold. It would have been obvious to one of ordinary skill in the art, at the time of invention to have modified the humidity device of Bartels et al. to monitor humidity by a humidity sensing means while keeping the humidity within a determined range or threshold for the well known purpose of preventing a cavity that is normally moist from drying out thereby causing inflammation causing discomfort. Both Bartels et al. and Daniell et al. in combination teach all of the limitations of the claims except for explicitly reciting that a pharmacological agent may be added into the stream of gas. Rusz et al. teaches the addition of a pharmacological agent to a stream of gas. It would have been obvious to one of ordinary skill in the art, at the time of invention, to have modified the combination of Bartels et al. and Daniell et

al. with the teachings of Rusz et al. to provide a respiratory device that is capable of delivering a pharmacological agent or anesthetic for the well known purpose of administering anesthesia during surgery.

*Response to Arguments*

6. Applicant's arguments with respect to claims 34-35, 38-39, 49-56, 59-60, 70-75, 97-99, and 101-106 have been considered but are moot in view of the new ground(s) of rejection necessitated by amendment.

*Conclusion*

7. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
